

SMART Nepal

"Building Intelligent Futures for Nepal"

SMART Nepal is a 7-week virtual program that connects young minds across Nepal who haven't yet enrolled in university. The program empowers students to explore, create, and innovate through project-based learning, guided by experienced mentors. Students work in small teams on open-ended projects, from writing research papers to prototyping tech solutions, while developing critical thinking, creativity, and collaboration skills. Mentors and guest speakers also provide guidance on future education, career paths, research, and innovation.

SMART Nepal is completely free (non-profit) and designed to give ambitious students an early start on innovation, research, and technology-driven impact.

Team

- Tech Lead: Ashok Gaire
- Program Manager: Bimarsh Pandey
- Graphic Lead: Madan Bhai
- Program Coordinator: Anil Bhandari & FieryCoder
- Program Lead: Shikhar Pandey

Thank you so much, everyone, for making Smart Nepal possible. Your dedication, support, and belief in this vision have helped turn an idea into reality. From our mentors and guest speakers to every student and volunteer, each of you has played an important role in this journey. We are excited to see the impact we can create together and look forward to an inspiring and successful program ahead.
